PROFILE

Passionate Full Stack Web Developer, specialized in React, Laravel, and WordPress, with solid experience in building high-performance websites and dynamic web applications.

Currently working as a developer at AgencyWMG, I contribute to the development of showcase websites, e-commerce platforms, and custom business applications.

Proficient in front-end technologies (HTML, CSS, JavaScript, Tailwind, ReactJS) and back-end languages (PHP, Laravel, Java, Node.js), I also have strong expertise in Agile/Scrum project management, writing technical specifications, Git version control, and API integration using Postman. Curious, detail-oriented, and self-driven, I am passionate about creating robust and scalable web solutions.

SKILLS

- Languages & Frameworks:
- HTML / CSS / Tailwind / JavaScript / ReactJS / PHP / Laravel / Java / Python / Node.js
- Databases:
- MySQL, MongoDB, SQLite
- Tools & Methodologies:
- Git / GitHub, Postman, Figma, UML, WordPress, Photoshop
- Project Management:
